METHODOLOGY

Figures are compiled from Miami MLS closed-sale records for condominiums at every price across the 1 neighborhoods own.miami tracks: the whole condo market, not only the listings on own.miami, which start at \$450K. Each sale is counted once (per MLS listing) in the calendar month it closed. Sales volume is the sum of closed prices; medians are per closed sale. Month-over-month and year-over-year changes are shown only when both months cover the same neighborhoods, where a neighborhood's full history starts later, the comparison is withheld rather than letting the change in coverage pass for a market move. Active inventory is live: condos listed for sale today at every price, excluding towers not yet delivered; months of supply divides it by the average monthly resale closings over the 12 months ending with the report month. Building health follows each building page: age under Florida SB-4D (first milestone at 25 years on the coast, then every 10) plus verified public records such as a City of Miami recertification on file.
